

FOR IMMEDIATE RELEASE

## 888voipstore.com to Distribute Vdex-40 Embedded Asterisk\* IP-PBX Online

San Diego, California, USA, 2 September 2008 -- The Amanda Company announced it has finalized an agreement with 888voipstore.com to distribute TechnoCo's Vdex-40 embedded Asterisk IP-PBX through their online store.

Vdex-40 is claimed to be the first Asterisk appliance to maximize voice quality by implementing multiple microprocessors dedicated to the separate processing of voice and data, this is in addition to separate digital signal processor(s) for voice compression using G.711, G.723.1, G.726 and G.729a/b and echo cancellation using G.168. Even with this advanced technology, the companies state that Vdex-40 remains a truly affordable, Internet enabled, IP telephone system designed specifically for the SOHO (Small Office Home Office) market.

Vdex-40 is a fully embedded Asterisk based platform that further minimizes the potential for mechanical failure by replacing a spinning hard disk drive with flash memory and eliminating the noisy fans of internal power supplies. The replacement of electro-mechanical components with flash memory and an external transformer provides greater reliability than the mechanical equivalents used with traditional PC server solutions.

"The Vdex-40 is an innovative product that provides our customers an affordable IP-PBX solution especially for those seeking a small form factor device," said Mr. John Molino, CTO of 888voipstore.com.

"888voipstore.com is a leading distributor of VoIP phones and IP equipment whose success continues to grow due to their commitment to the market and its emerging technologies. Their leading online presence is immense and their online store is superior than most others that I have experienced," said Mr. David Woo of The Amanda Company. "We are very pleased that 888voipstore.com have agreed to carry the Vdex-40."

For additional information regarding Vdex-40, contact David Woo or visit [www.taa.com](http://www.taa.com). Product is currently available and shipping.
